

# **Mains Mentorship Batch A**

*2024*

*SOMP*

## **INTRODUCTION**

*Although days are less but You have sufficient time to clear Mains but not to waste.*

***Mentor will always be available with you, this is the commitment of SOMP.***

**What will be the role of SOMP Mentor in Mains mentorship?**

**"You just ask anything Tangible you want to achieve and we will help you to achieve that."  
It can be improving the marks overall or paper-wise, study hours or anything.**

**The first challenge which a candidate faces is the right plan which will lead to success. But Most of the times candidates make a plan which itself becomes very difficult to execute and eventually they have to rely on someone else's plan.**

**In the mentorship you will get an individual plan which will be executable under the overall guidance of Mentor.**

- **Syllabus completion**- Providing right direction to complete the syllabus in lesser time with better retention and notes.
- **Strategic sessions** - Role of such sessions is to provide the guidance of each and every part of the syllabus whether notes Making or answer writing or improving study hours.
- **Answer writing** - Under Hurricane batch of live answer writing either in 3-5-7 or 7-7-7 with proper evaluation. Alongwith the discussion with the Mentor.
- Full length 4 tests with detailed discussion.
- **Pyq Analysis live sessions**
- **Essay**- in depth sessions of Essay with live writing.
- **Accountability**- 2-way process where you will be accountable to the mentor and the mentor will be accountable to you.

- **Motivational and Psychological support**, at all times. Along with some constructive beating if required, so that you don't become complacent.
- **Fortnightly performance review.** Many students struggle here and keep moving aimlessly in the time domain.
- **Balancing the preparation.** The most crucial part of the entire preparation. Most of the students lose the game here and move aimlessly in the space domain. A student needs to understand that he's not bad at GS1 or GS4 or Optional, but rather in managing the 9 papers, and that too according to the present trend.

**Balancing the preparation is a science and an art, which needs to be communicated and reinforced.**

**In UPSC, you need a bird's eye view of the preparation, rather than a microscopic one.**

### **Expected Role of Mentee:**

**"Aim high with less ego"**

- Being sincere, diligent and hardworking
- **Having Faith on the Mentor** (unless you are absolutely sure that your Mentor is not right)

- **Maintaining 2-way communication.** Don't break the communication and then complain later. Let the mentor know what issues you are facing.
- Understanding that despite everything, mentee has to play the game. The mentor cannot do it on your behalf. The role of Mentee: Mentor is 90:10. If someone is telling you otherwise, they are lying
- **Try not making it a transactional relationship,** rather make it a Mentor- Mentee Relationship.

**Course Fee - 20,500/ (Inclusive of all taxes)**

**Course validity - till Mains 2024 .**
