

Beat the heat:

25 question everyday for 40 days.

As the prelims draw closer, the more focus is going to shift towards covering and revising your syllabus. It is going to have its own advantage but with the time crunch that you have, to manage the application of what you have learnt so far is also crucial at this stage. It is almost impossible to do FLT everyday or every other and to revise and analyse is almost out of the question.

Such a trade off if mismanaged can cost you greatly. But as SOMP has been there for you through this journey so far, we plan to make this last leg of your preparation smooth, stress free and highly productive.

We are introducing a 40 day plan where you get to solve 25 questions each day under half an hour, which includes 20 static and 5 current affairs questions.

The idea is to keep that practice and studying more effective and result oriented. You should be able to beat the heat before exam and not feel the burn right there. If you can consistently manage 25 questions under 30 minutes each day, not only it will help you revise better but also teach you to perform in high stress conditions. Managing this stress at this stage is much easier than to crumble under it in real exam conditions.

The quality of questions is at par with the UPSC pyq's and the analysis will be short and sweet as to save you precious time.

Final UPSC 40-Day Revision Plan

Day	Date	Weekday	Subject	Focus Topics	Current Affairs	MCQ Plan
1	15 Apr 2025	Tuesday	Polity	Historical Background, Constitution, Preamble	May 2024 W1	20 Static + 5 CA
